

Experience

IT Helpdesk Technician

December 2023 - Present

F&A Credit Union

- Manage **Corelation Keystone** financial core system; automate batch transaction postings and purge workflows in **Python** and **Java**; build **SQL** reports and dashboards in **Jaspersoft**
- Manage and configure **Cisco** firewalls and rulesets, switches, ACLs, and site-to-site VPN tunnels linking multiple branches and data centers; troubleshoot network issues; monitor VPN connectivity and **SAN** replication latency to meet RTO/RPO targets and maintain disaster recovery procedures
- Administer **Active Directory** and **Microsoft Entra**, including group policy and scripted account onboarding and offboarding; prepare **Microsoft 365 Copilot** rollout by assigning licenses and auditing SharePoint/OneDrive permissions
- Manage endpoint patching with **NinjaOne**; automate **Linux** and **Windows Server** configuration and software deployment across 150+ endpoints with **Python**, **Powershell**, and **Ansible**
- Run vulnerability management with **Tenable** and respond to incidents escalated by the SOC; support **NCUA** exams, external audits, and penetration tests by gathering evidence, writing reports, and remediating findings
- Resolve **SysAid** helpdesk tickets for staff across branches, covering hardware, software, and account issues
- Build card transaction alerts platform in **Python** and **Twilio** that sends members real-time SMS/email alerts on card activity; system processes 10,000+ daily transactions with <2 second latency

Software Development Engineer

May 2022 - August 2022

Amazon (Internship)

- Build **AWS CDK** infrastructure-as-code in **TypeScript** to provision **AWS Lambda** functions, **DynamoDB** tables, and least-privilege **IAM** roles for a data processing service
- Build CI/CD pipeline with **CloudFormation** for automated testing and deployment, backed by **Pytest** unit and integration tests targeting 100% branch coverage
- Develop **Python ETL** service that attaches to the Customer Interests team's data pipeline and builds a high-confidence golden dataset from each new batch of Mechanical Turk labels, used to train models mapping storefront products to interest categories

Software Engineer

September 2023 - December 2023

Hack for LA (Volunteer)

- Develop **React** components and client-side routes for the 311-Data project, allowing residents to query and visualize 500k+ annual service requests to the City of Los Angeles
- Lead codebase migration from React 16 to 18 and Node 12 to 18, resolving breaking changes, refactoring deprecated patterns, and reducing bundle size

Frontend Software Developer

September 2021 - February 2022

California State University, Fullerton (Volunteer)

- Build **Next.js** frontend and **AWS Lambda/PostgreSQL** backend for TuffyHacks, an MLH-sponsored hackathon, enabling participants to form teams and exchange invite links

Projects

Homelab *Proxmox, AdGuard Home, Tailscale, WireGuard*

- Run a **Proxmox** host on a network split into VLANs and subnets, with **AdGuard Home** handling DNS filtering
- Self-host shared drives and other services, reachable remotely over **Tailscale**, replacing an earlier self-managed **WireGuard** VPN

Spotify Seasonal Playlists *JavaScript, Python, Flask, Spotify REST API, Next.js, Docker, NGINX*

- Build a Flask/Next.js app that sorts users' liked songs into seasonal playlists, deployed with Docker behind NGINX; serving 20+ users

Education

California State University, Fullerton

Bachelor of Science in Computer Science, Minor in Mathematics

Skills

Programming Languages: JavaScript/TypeScript, Python, Powershell, Rust, Java, $\text{\LaTeX}$, SQL

Systems: Corelation Keystone, Windows Server, Linux (Debian, Ubuntu, Red Hat), Active Directory, Microsoft Entra, Group Policy

Cloud and Operations: AWS, Microsoft Azure, VMware ESXi, Proxmox, NinjaOne, Tenable, SysAid, Ansible, Docker, NGINX, Apache

Networking: Cisco ASA, Cisco switches, Cisco Meraki, FortiNAC, Versa SD-WAN, TCP/IP, VPN, ACLs, DNS, DHCP

Certifications: AHA First Aid CPR AED, CCNA 200-301 (In-Progress)
